

## Disc Waiver

It is our procedure that every client supply their disc content in final physical working form on approved masters (i.e) CD(R), DVD(R), BDR or DLT Tape, properly formatted, as this ensures exacting replicated units. Doing so provides you with our guarantee that the quality and performance of the supplied master will result in exact copies as supplied without changes or alterations of any kind.

This form is for use in instances when client wishes us to alter the contents or download a disc image to satisfy mastering requirements outside of our standard procedures or the disc content exceeds Red Book Standard maximum length of 74 Minutes 44 seconds.

This form acknowledges the customer has requested one of the following to occur:

- Supplying the master via FTP/Upload/ (As an ISO , DDP or Raw Files for Master creation)
- Changes or modifications to their production master (you wish us to fix something as specified in the notes section below.)
- A supplied master that exceeds the maximum Red Book Standard length.

The undersigned consents to waiving the standard procedure of 'check disc' approval to verify the data has been downloaded correctly or alterations are verified to avoid any issues. In this case, the client acknowledges their acceptance that a check disc will NOT be sent and hereby accepts full responsibility for the final product and waives any warranty right or claim to rejected manufactured discs products, and/or refuse to pay for the manufactured disc products in full, due to the disc failing to perform because of any problem whatsoever relating to the content, alteration, or faults on the pre-mastered disc which is to be used as the master.
